

# Managed NaaS for Failover

Network-as-a-Service solutions monitored and managed 24x7x365

Business continuity is critical to any effective network strategy, providing communications integrity and peace of mind. With enterprises deploying increasingly more complex applications and services, whether to entice customers or modernize an office space, avoiding network downtime and disruption has become critical to the bottom line.

Overall Network

## Disruption-free, always on connectivity

Ventus Managed NaaS for Failover delivers comprehensive, secure network redundancy via secondary cellular or broadband connectivity. In the event of a primary network outage, Ventus routers automatically detect the drop and seamlessly fail over to the secondary network until primary service returns.

With Ventus Failover in place, enterprises can sidestep the IT headaches, resource drain, and costly downtime of a service outage for a disruption-free, always on network environment.

## Why Ventus?

Ventus Managed Network-as-a-Service is an end-to-end platform designed to support your entire enterprise WAN. Ventus' knowledgeable and responsive networking experts and dedicated client care teams handle all the critical details of network management including pre-engineering, hardware provisioning and deployment, network security, continuous monitoring, and 24x7x365 US-based technical support.

## Benefits

- Fully monitored and managed by Ventus
- 4G LTE or broadband connectivity
- Seamless business continuity
- Automatic failover detection
- Quick deployment and installation
- Software/IP license management
- Power alerts
- PCI DSS 3.2 Level 1 certified

## Managed Network-as-a-Service

Businesses depend on their network to drive applications, improve communication, and better serve customers. Ventus NaaS solutions offer always on connectivity, advanced end-to-end security, and consistent reliability, ensuring distributed enterprises get the most out of their network.

Ventus NaaS solutions are built and managed by Ventus networking experts, ensuring businesses in finance, retail, healthcare, hospitality, and other sectors achieve secure, persistent connectivity for networked applications at distributed branch and office locations. From high-level software-defined networking to mission critical IoT services, Ventus NaaS solutions are scalable to meet specific business needs of any scope.

NaaS solutions are deployed and managed end-to-end, and include pre-configured hardware, dedicated client teams, continuous monitoring, and 24x7 technical support.

### Networking experts

Our engineers design and architect a fully integrated network tailored to meet your specific business needs.

### Our promise to you

All Ventus managed solutions include dedicated client teams, continuous monitoring, service level agreements, and 24x7 technical support.

### Genesis™ Network Monitoring

Ventus' proprietary monitoring platform that offers intelligent device and connection management, maximizing business uptime and efficiency.

### Comprehensive coverage

Extensive wireless and fixed line coverage gives your business ultimate connectivity flexibility.

### Top applications

- Multiple endpoints
- Branch/Office/Remote location
- ATM/Kiosk/POS
- Digital signage/Video
- IoT/M2M
