V4200 Networking Router
Broadband | XLTE | 4G LTE | HSPA+ | 3G | CDMA | GSM

V4200

The V4200 delivers steadfast connectivity for large corporate environments, with two customizable interface slots that enable a wide range of configurations, including fixed-line applications. The V4200 provides high-speed wireless access for bandwidth intensive applications like primary and backup WAN and LAN, corporate Internet, Wi-Fi hotspots, video surveillance and DVR, VoIP, and server/switch capability. Compact enough to be easily stored out of sight; the V4200 can also be installed in a server cabinet with optional rack-mount brackets. The V4200 supports all cellular technologies, including 4G LTE with backwards compatibility to 3G and 1xRTT.

Features

- Multiple Interfaces: 2 customizable slots, 8 Ethernet, USB, RJ11 CO, RJ45, SD Card, optional 1TB of onboard SATA storage
- Customizable Interfaces: Wi-Fi, GPS, DSL, Cable, DSO/DS1/DS3, GigE, MPLS, Fiber, IP PoE, Serial, IP/BNC Video
- Physical Security: aGPS to detect and track device movement in case of theft, embedded tilt sensors and access panel alarms to alert for tampering or vandalism
- FCC/CE/Carrier certified & PCI DSS compliant
- Commercial grade powder-coated galvannealed steel and passivated aluminum alloy
- Secured Networks with high level encryption, stateful firewalls, and active intrusion detection

Applications

- Workstations
- VoIP
- POS
- Failover
- Surveillance
- Kiosks
- ATMs
- Digital Signs
- Gaming & Lottery Terminals
- Alarm Panels

![Ventus Global Network Solutions logo]

Ventus provides fully managed network solutions for enterprise businesses, ensuring millions of distributed locations achieve persistent, always on connectivity.
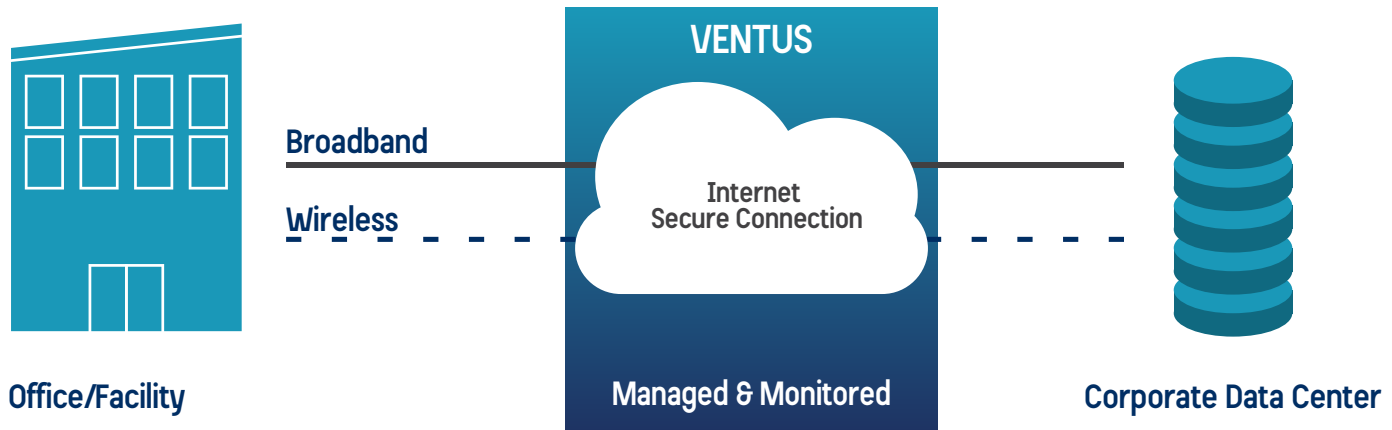

Ventus Managed Solution

- Solution engineering
- Project implementation engineering
- Router pre-configuration and set-up
- Technical support service 24x7x365
- Next day maintenance replacement
- Dedicated project management
- Secure VPN networks
- Multiple gateway routing

Ventus Telecommunications Management

- Street level site qualifications
- Multi-carrier access
- Equipment installs and break/fix
- Data plan analysis and assignment
- Cross carrier pooling
- Network provisioning
- Single invoicing

Better Networks. Built and Managed by Ventus.

Ventus Technologies Hardware

- 4G LTE, broadband, and MPLS connectivity
- Pre-configured routers
- Ongoing software updates
- Built-in battery backup
- Tilt sensors
- Quick install magnetic base

Ventus Genesis Network Monitoring

- Centralized device management
- Device and network status
- Over-the-air updates
- Remote device reconfiguration
- Remote installation support
- Troubleshooting & diagnostics
- Customizable maintenance alerts
